

TBM offers deep-clean disinfection fogging services for businesses that want to protect staff and customers with an effective sanitising solution that works in any enclosed space. This covers trains, buses and trams, containers, offices, schools, care environments and other commercial settings.

Powerful “fogging” machines spray an even layer of safe disinfectant solution over all areas. The active ingredients are on the list recommended by the World Health Organisation. It kills up to 99.999% of bacteria and inactive viruses so surfaces are disinfected in one efficient step.

The product dries within thirty minutes and work areas are ready for use. It creates a protective barrier that lasts up to 30 days. The solution is safe to use in kitchens, restaurants and other working environments that need staff and equipment to be safe and hygienic.
