

Post COVID Solutions

# POST COVID SOLUTIONS

A comprehensive range of solutions to protect shoppers, colleagues and the public at large, during the easing of lockdown...

## TEMPERATURE CHECK SYSTEMS

Spectre Temperature Check with Facial Recognition

TAURI Temperature Check Tablets

## HAND SANITISER SYSTEMS

MeDi Hand Sanitisers

Digital Signage Kiosks with integrated Hand Sanitisers

## NEW TECHNOLOGY

Sprint Thermal Cameras

Temperature Screening Smartphones

## SANITISING and MISTING SERVICES

## HYGIENE SCREENS

Accessory range

Protective Roller Blinds

*“It’s not that we are at the end, or near the end, of this pandemic. We are probably 10-15 per cent through the history of Covid-19”.....”People don’t realise until too late how dangerous things are”*

Steve Reicher, Professor of Social Psychology, at the University of St. Andrews, and member of Spi-B, Governmental Advisory Group.

THE TIMES | Thursday 14 May 2020

# SPECTRE TEMPERATURE CHECK TABLETS

## with FACIAL RECOGNITION

- 8" IPS full-view LCD display
- Table top, wall mounted, floorstand options
- IC / ID card integration
- Dustproof, stable and reliable
- Accurate facial recognition even when wearing a mask
- Fast human body temperature detection from 0.5 metres

# SPECTRE stand options and HAND SANITISER module

**1.1m stand**  
**Adult**

**1.4m stand**  
**Adult**

**0.6m stand**  
**Children**

**Table**

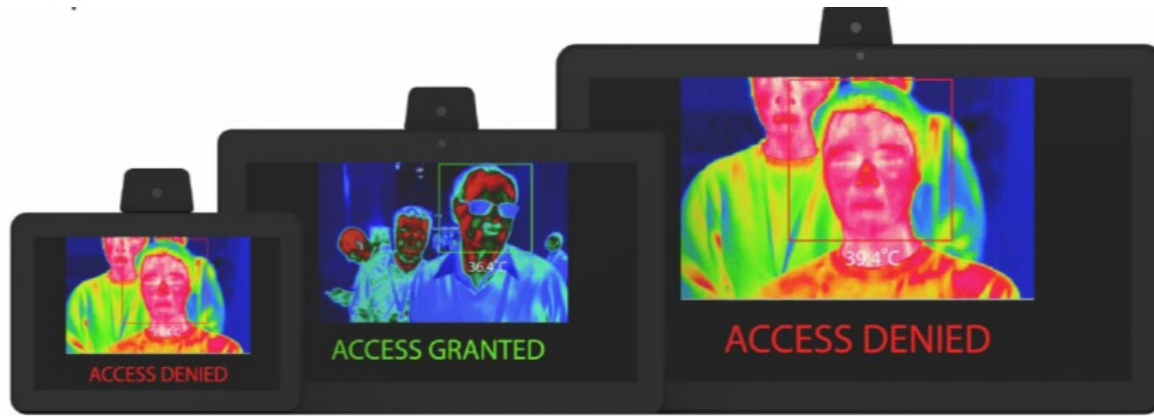

# TAURI Temperature Check Tablets

## INCREASED SAFETY WITH A QUICK TEMPERATURE CHECK.

- Three screen sizes – 10.1", 15.6" and 21.5" to fit all applications
- Fast detection accuracy
- Compatible with Linux, Windows, and Android
- First layer of screening before entry to premises
- Contactless, so more hygienic
- Keeps your environment safe
- Avoids contamination
- Reduces stress and anxiety
- Ideal range 0.5 – 1 metre
- Reading within 3 seconds
- Sensor developed by Heimann, Germany

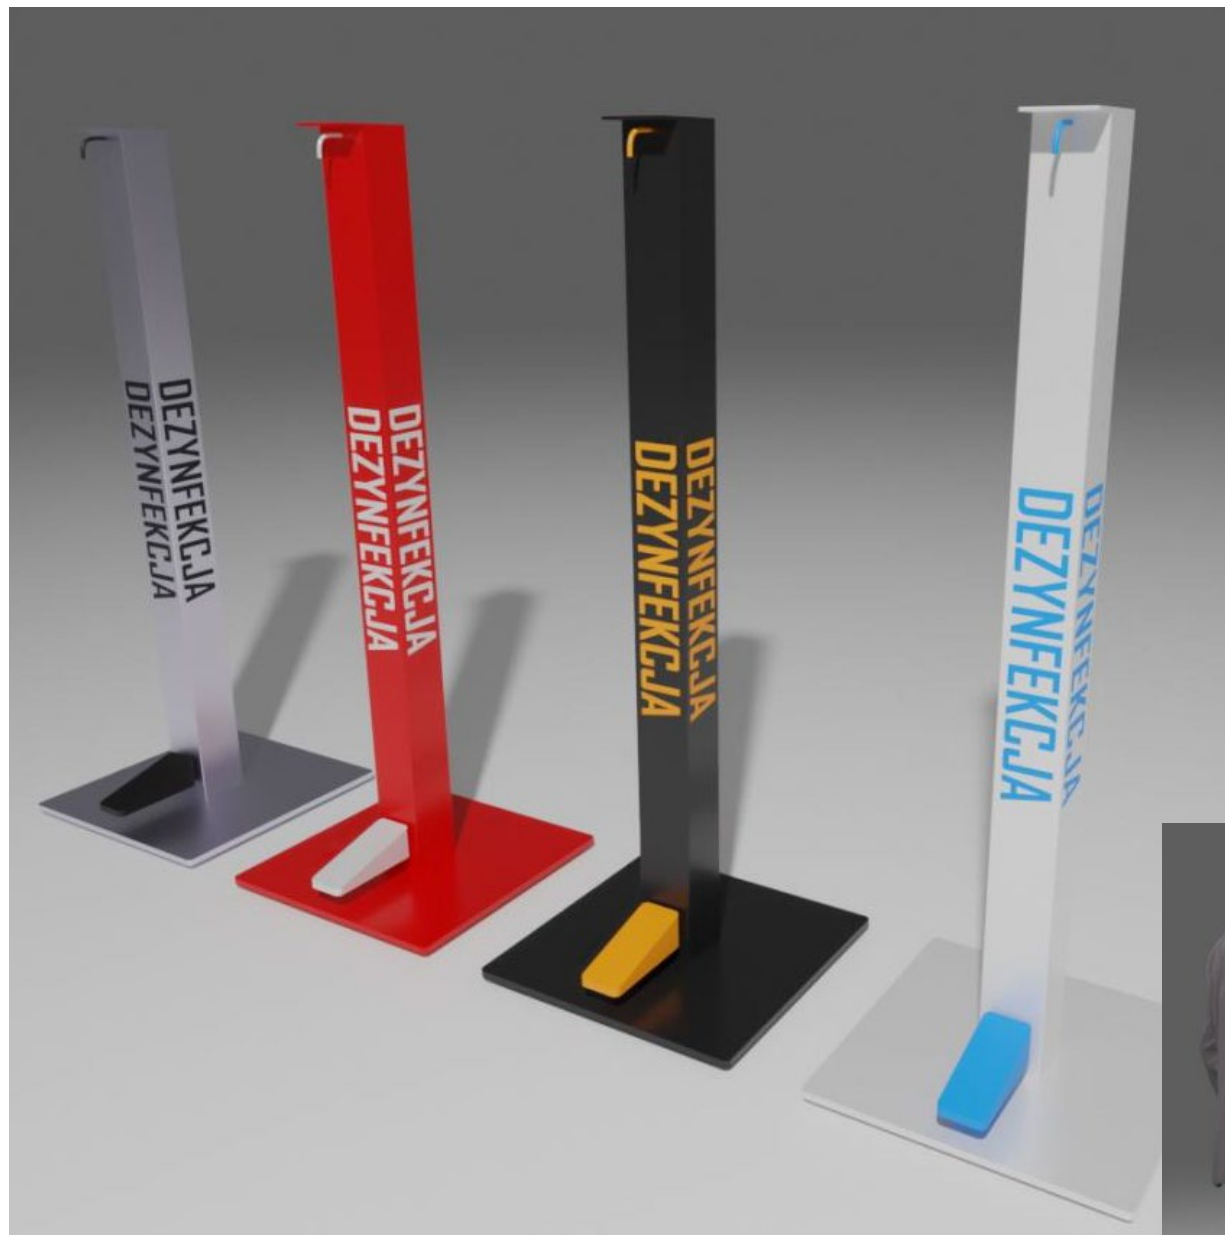

# TAURI accessories

A range of table top stands and wall mounted brackets is available to fit all applications

# MeDi HAND SANITISERS

- Foot pump for safer dispensing
- Choice of standard RAL colours
- Can be customised with your own logo / artwork
- Refillable container for 1.5 – 2 litres of fluid
- Drip tray option if required

# DIGITAL SIGNAGE KIOSKS with HAND SANITISERS

- 21.5 inch Digital Signage LCD screen
- 15.6 inch screen option
- Wall mounted option / Floor stands available
- Android OS 6.0/8.1 system
- Remote content management software
- Hand Sanitising Gel Auto Dispense
- Touch free to avoid cross infection
- Dispensing Life - more than 650,000 uses
- Monitoring feature checks real time dosage
- Notified by e-mail when refill required
- Volume: 3000ml

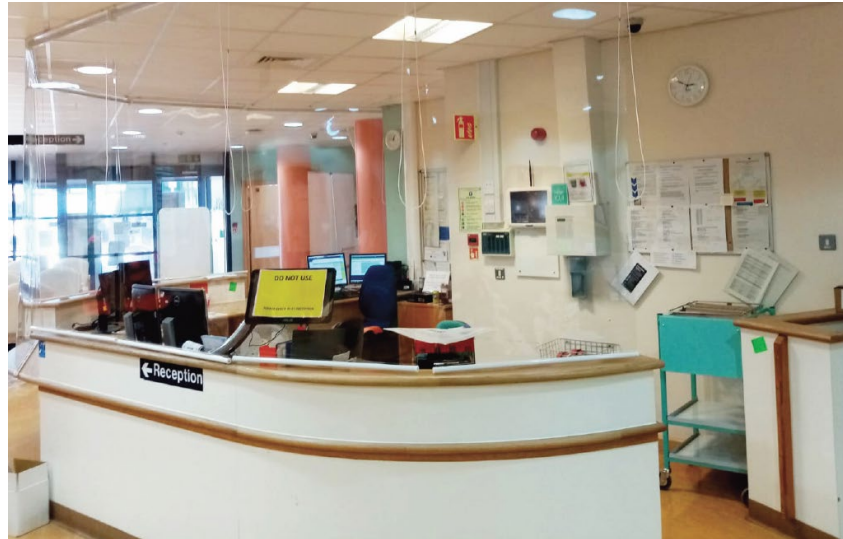

# HYGIENE SCREENS plus accessories from CLAN INNOVATIONS

# PROTECTIVE ROLLER BLINDS from CLAN INNOVATIONS

# TBM SANITISING SERVICES

The Coronavirus has caused panic leaving people and organisations concerned about working in areas that might have been contaminated.

TBM offers a deep-clean solution that is effective in any enclosed space including retail stores, offices, schools, care environments and most other work areas, as well as trains, buses, trams, and containers.

Powerful “fogging” machines spray an even layer of sanitising solution over all areas. The solution kills up to 99.9999% of germs within minutes in dirty conditions, so all surfaces are cleaned and disinfected in one step.

# SPRINT TEMPERATURE SCREENING SMARTPHONES with THERMAL IMAGING

Many businesses including retail, hospitality, logistics, construction and manufacturing are now using EST (Elevated Skin Temperature) detection to protect staff and customers.

The Cat S60 Series Smartphones have an integrated FLIR thermal imaging system able to provide an effective role in triage screening for EST.

Super simple to use - can be handheld or tripod mounted and set up in less than 10 minutes. The Cat S60 and S61 are fully functioning, highly durable Android smartphones as a real alternative to stand alone thermal imaging cameras.

# Temperature Screening Thermal Solutions

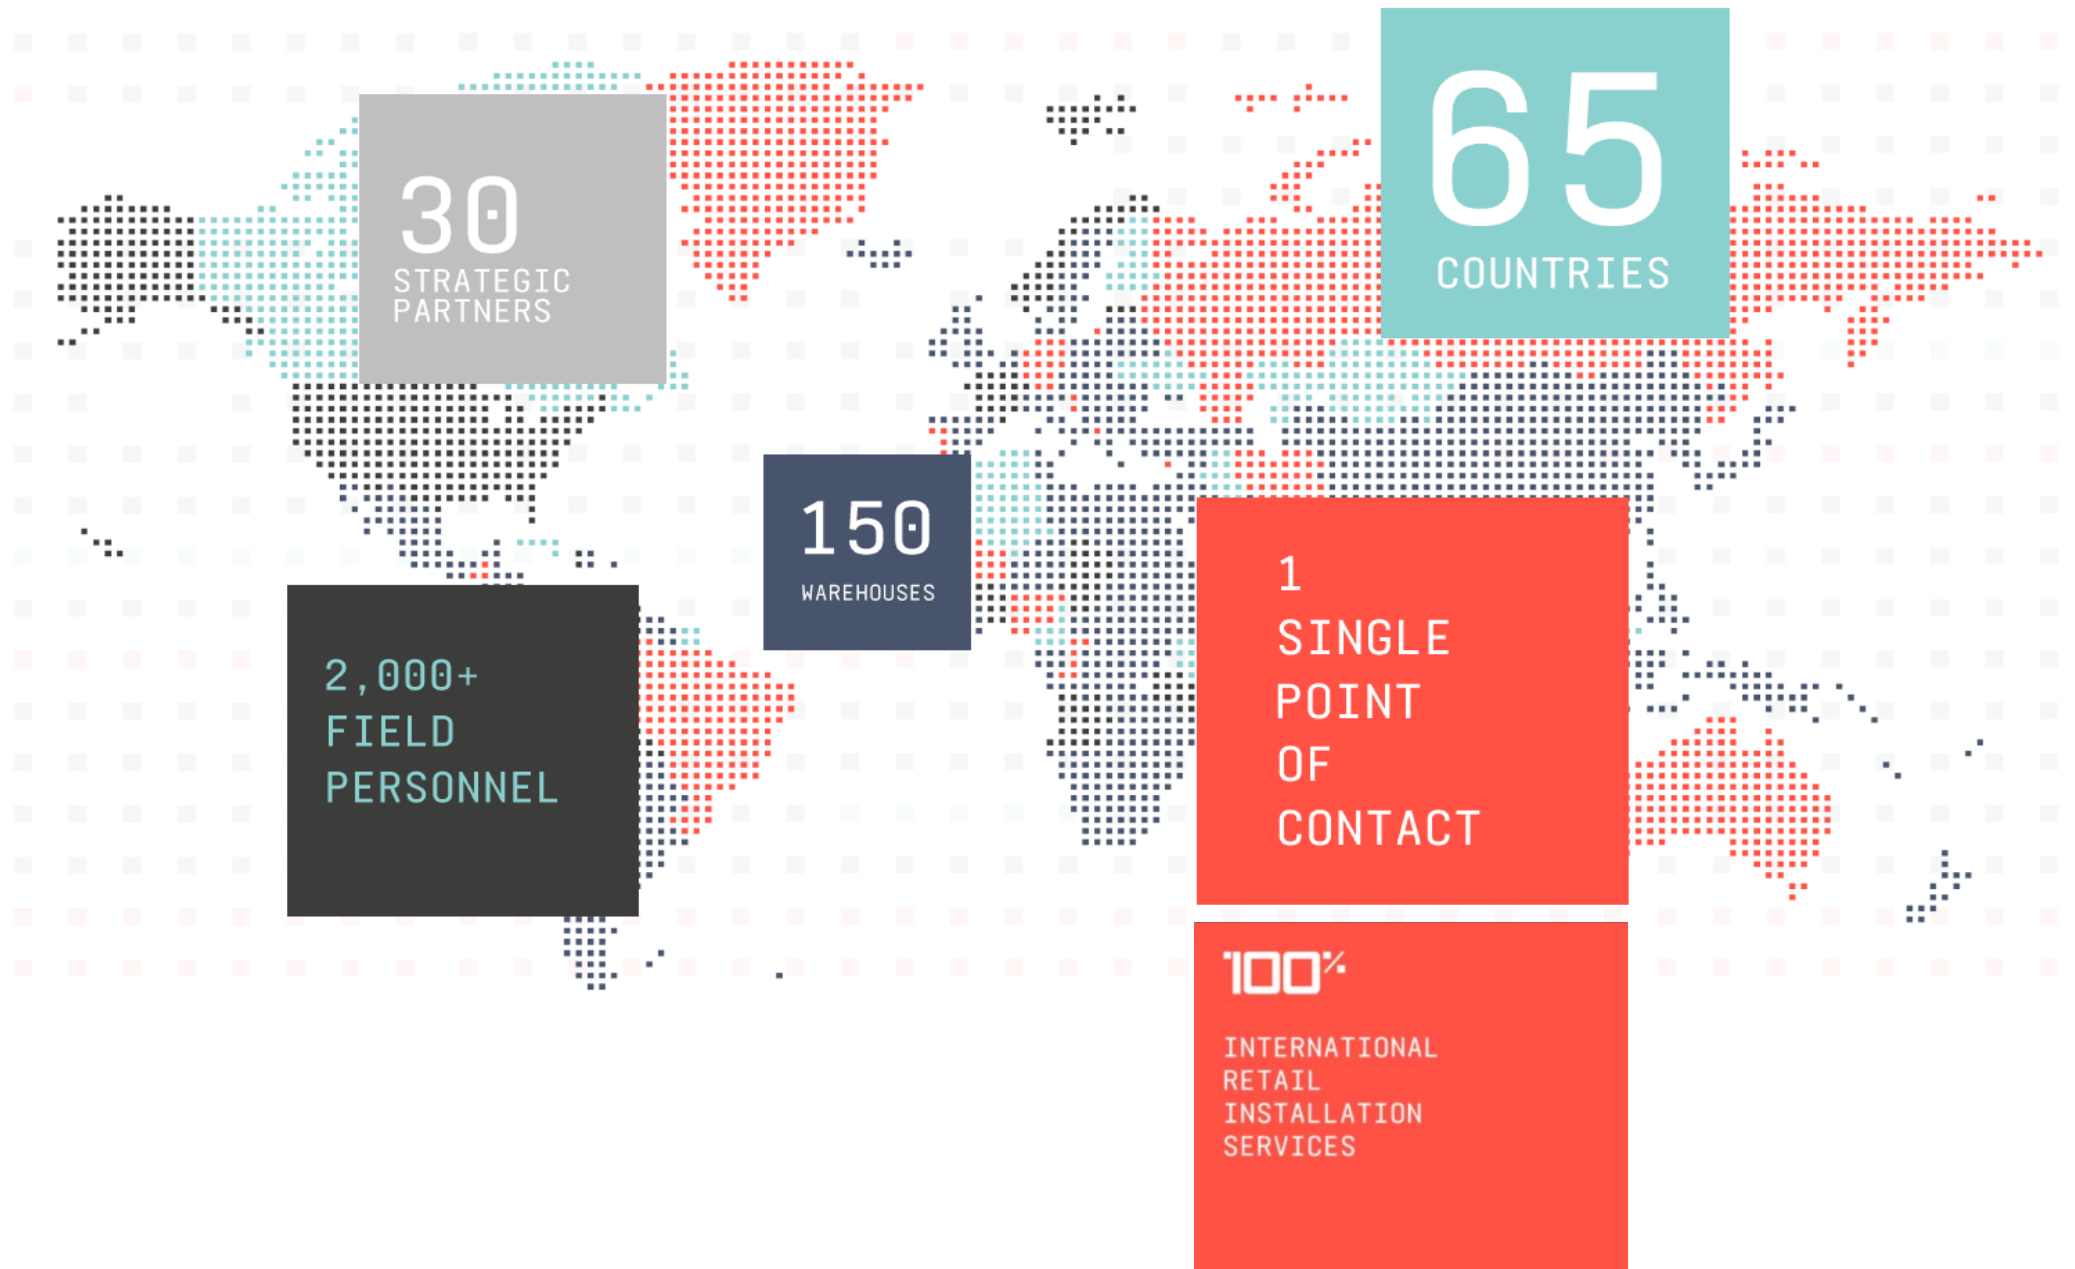

## SAFER, FASTER, SMARTER

With advanced detectors and algorithms, our Temperature Screening Thermal Camera can detect elevated skin-surface temperatures in moving crowds and so can be used for rapid and preliminary temperature screening for office buildings, factories, stations, airports and other public places, with accuracy up to  $\pm 0.5^{\circ}\text{C}$ . This can be improved if needed to  $\pm 0.3^{\circ}\text{C}$  by the installation of a black box calibration unit.

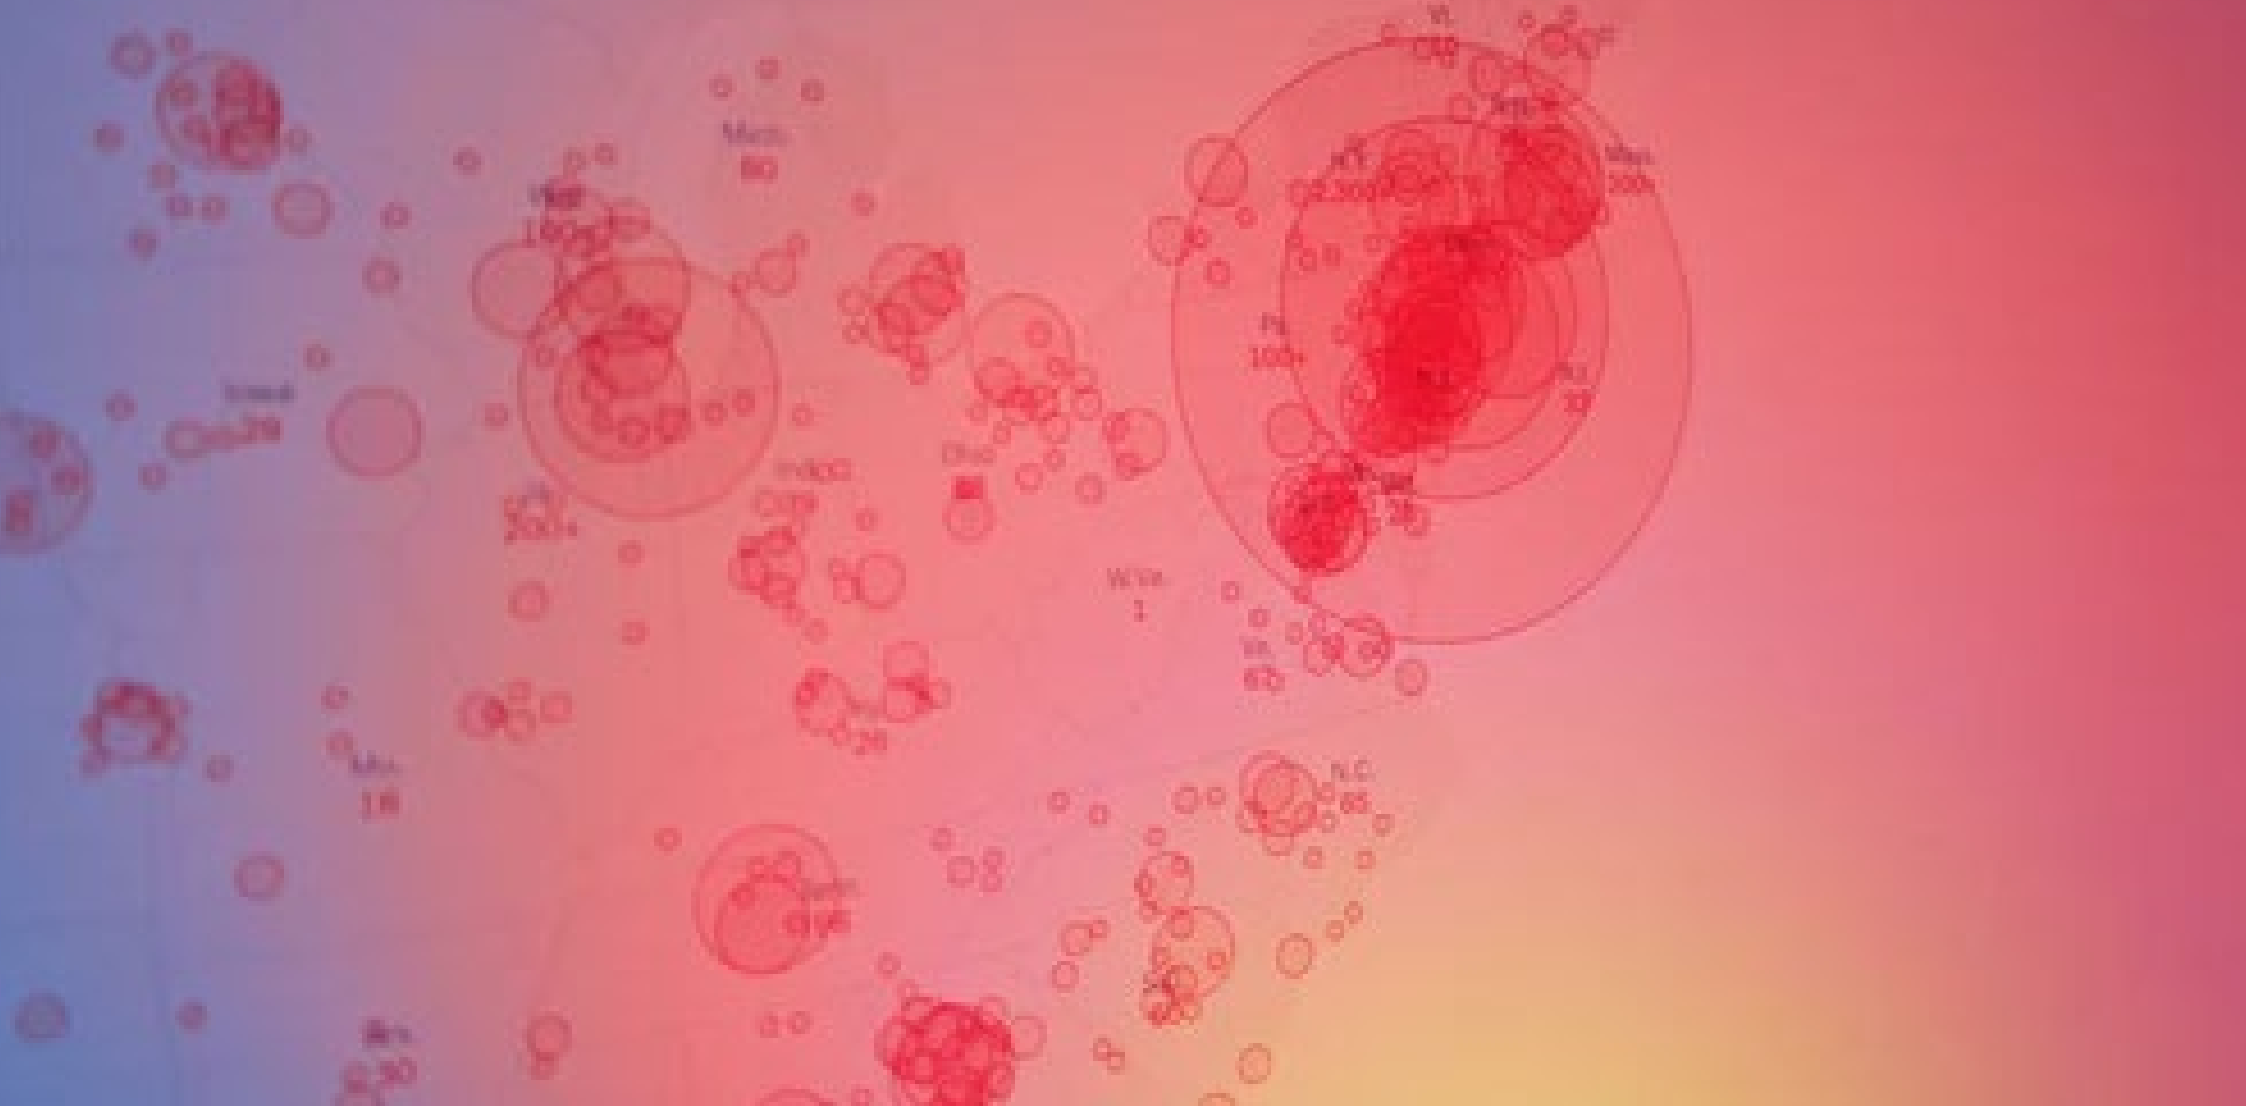

# GLOBAL DISTRIBUTION AND INSTALLATION SERVICE for all post COVID solutions
